Fluid Phase Equilibria, 93 (1994) 389–390
Elsevier Science B.V.

Contents of Volume 93 (1994)

Estimation of DISQUAC interchange energy parameters for 1-alkanols + benzene, or + toluene mixtures
J.A. González, I.G. de la Fuente, J.C. Cobos and C. Casanova (Valladolid, Spain) 1–22

Prediction/correlation of vapor–liquid equilibria in synthetic gas and oil systems
K. Anastasiades, S. Stamataki and D. Tassios (Athens, Greece) ... 23–54

Modelling the influence of pressure on the phase behavior of systems containing water, oil and nonionic surfactants
K. Knudsen, E.H. Stenby and J.G. Andersen (Lyngby, Denmark) . 55–74

Modelling of solid phases in thermodynamic calculations via translation of a cubic equation of state at the triple point
P.H. Salim and M.A. Trebble (Calgary, Alta., Canada)..... 75–99

Construction and application of physically based equations of state. Part III. Correlative and predictive application to the refrigerants R22 and R152a
B. Saager and J. Fischer (Bochum, Germany)..... 101–140

A generalized correlation for the interaction coefficients of CO_2–hydrocarbon binary mixtures
A. Kordas, K. Tsoutsouras, S. Stamataki and D. Tassios (Athens, Greece)..... 141–166

Correlation of enthalpies of vaporization of pure substances. Part I
V. Svoboda and P. Basařová (Prague, Czech Republic)..... 167–175

On "tuning" the CCOR equation parameters to the saturation curve
G. Čirić and R. Paunović (Novi Sad, Minor Yugoslavia)..... 177–192

An approximate nonrandom lattice theory of fluids. General derivation and application to pure fluids
S.-S. You, K.-P. Yoo and C.S. Lee (Seoul, South Korea)..... 193–213

An approximate nonrandom lattice theory of fluids. Mixtures
S.-S. You, K.-P. Yoo and C.S. Lee (Seoul, South Korea)..... 215–232

Solubility of hydrogen in a mixture of *n*-hexane and dicyclopentadiene from 313 to 363 K and from 2.0 to 5.5 MPa
M.-S. Fu and C.-S. Tan (Hsinchu, Taiwan)..... 233–247

Thermodynamics of binary mixtures containing linear or cyclic alkenes + *n*-alkanes or cyclohexane
B. Marongiu, B. Pittau, S. Porcedda (Cagliari, Italy) and M.R. Tiné (Pisa, Italy)..... 249–276

Solute–solute interaction enthalpies in solutions of copper(II) chloride in organic solvents having nitrogen donor atoms
P.P. Singh, S. Maken and V. Sharma (Rohtak, India)..... 277–283

Optimization of UNIQUAC structural parameters for individual mixtures: application to new experimental liquid–liquid equilibrium data for aqueous solutions of methanol and ethanol with isoamyl acetate
A. Arce, A. Blanco, J. Martínez-Ageitos and I. Vidal (Santiago de Compostela, Spain)..... 285–295

Bubble pressures and saturated liquid molar volumes of binary and ternary mixtures of chlorofluorocarbons and hydrochlorofluorocarbons
S. Laugier (Talence, France), D. Richon and H. Renon (Fontainebleau, France) 297–316
Fluid phase equilibria and critical phenomena for the dodecane–water and squalane–water systems at elevated temperatures and pressures
R.L. Stevenson, D.S. LaBracio, T.A. Beaton and M.C. Thies (Clemson, SC, USA) 317–336
Measurement and modeling of atmospheric pressure vapor–liquid equilibrium data for binary, ternary and quaternary mixtures of sucrose, glucose, fructose and water components
S. Abderafi and T. Bounahmidi (Agdal-Rabat, Morocco) 337–351
Phase behavior of reservoir fluids. VI. Cosolvent effects on bitumen fractionation with supercritical CO_2
J.M. Yu (Calgary, Alta., Canada), S.H. Huang and M. Radosz (Annandale, NJ, USA) 353–362
P, *V*, *T*, *x* values of the gas–liquid phase equilibria in the binary system methane–ammonia at high pressures
H. Lentz (Siegen, Germany) and M. Weber (Marl, Germany) 363–368

Short Communications

Excess volumes of binary mixtures of triethylamine with aromatic hydrocarbons at 308.15 K
P. Venkatesu and M.V.P. Rao (Andhra Pradesh, India) 369–376
Generalization of a polar-fluid Soave–Redlich–Kwong equation of state
J.O. Valderrama, H. De la Puente (La Serena, Chile) and A.A. Ibrahim (Dhahran, Saudi Arabia) 377–383

Announcement 385–386
